

**Install Instructions**

1. License plate holder mounts just below the chrome bumper bezel, centred on the bumper. Mounting locations corresponds with indented marks along the bumper face and the recessed pocket on the backside of the bumper.
2. Locate appropriate mounting holes for license plate holder being installed and mark.
3. Drill marked locations using a 9/32" drill bit.
4. Install supplied 1/4" hardware, leaving loose enough to be able to slide tabs of license plate holder behind the bolt head and washer.
5. Remove protective plastic from tabs.
6. Slide license plate holder onto bolts and tighten, ensuring that the holder is flush with the chrome bumper bezel.
7. Fasten brace to bottom of license plate holder. Leave loose for adjustment.
8. Using the supplied #14 screws, fasten brace to bottom of plastic fairing guard located under the bumper.
9. Fully tighten all hardware.
10. Remove protective plastic and clean with glass cleaner, if necessary.
